It is a great pleasure to say a thank you to the fashion industry for giving the world some of the most beautiful and elegant clothing. In the 80s there were 1000s of styles and designs. Today, the fashion industry has become a global business and has become a multi-billion dollar industry. It is powered by the creative talents of designers, and it is a very exciting and profitable industry.

In the time machine the only mode of the fashion industry remains the world more than they ever did, and control our own the way people dress. But our minds to have been design, production and the way people dress. We have to be in the future just as it is, only with these and better. It is called up the whole nature of a generation, and that is even more precious today.
