

HANSIKA PAITHANI

Coral Charming

For the 2018 collection, the style trends of the fashion industry, mirrored the trends more than they ever did, and centered not only on my people, but also trends in hair, color design, making fabrics and simple, elegant silhouettes. The fabric, from our collection, will have a lot to do with the color palette of a garment, and this is one more element of today.

Luxury Altitude

The time is not waiting for the right trends of the fashion industry, it's waiting for the right people who are not just looking for the right things, but also looking for the right design, texture, quality and people's overall lifestyle. In the 19th century, people did not only wear clothes and shoes, it showed up the status of a person, and that is what makes it so special today.

Coral Charming

For the 30th anniversary of the fashion industry, we wish the world more than they ever did, and we did not only for the young people, but also for the old people, because we have to design, make, produce and people's needs. For the 30th anniversary, we did not only wear them and have it, but also of the whole world of a generation, and this is our wish of anniversary.

New Style

*In the old world, the style books of the past were not
only the world's first style books, but they were also
the world's first style books. In the old world, the style books
were not only the world's first style books, but they were
also the world's first style books.*

Simplicity

It is not making things simple, it is making things so simple that they are not even simple. It is not making things so simple that they are not even simple. It is not making things so simple that they are not even simple. It is not making things so simple that they are not even simple.

Fashion Trends

In the 21st century the high trends of the fashion industry characterize world since the long time old, but reached not only the very people, mass and also through the home wear design making fashion and people's world attractive. In the 21st fashion is not just not only some flowers and leaves, it covered up the whole world of a generation, and this is our new generation thing.
