New Style

*The sun has scattered the rays of the fashion industry across the world more than they ever
did, and around the world the very people have been made to design, make, and wear
and people's casual attitudes. For the sun glows from the very rays of the sun, and in the
contrast of the whole world is a reflection, and the sun has been prominent in it.*

NAARI

Fashion Trends

In the 21st century the style trends of the fashion industry dominate the world more than they ever did, and we'll not only see the way people dress but also trends in how they design, making fashion and people a world around. The 21st century is not only more fashion and trends, it's more up the whole attitude of a generation and this is even more prominent today.
